Takeda Oncology Pipeline

Beginning with patients' needs, we build our pipeline by identifying the most promising science and collaborate with leading teams around the globe to accelerate innovation. Our oncology R&D activities are focused on translating science into curative or transformative potential treatments by targeting tumor vulnerabilities and through novel strategies that leverage the power of innate immunity.

These therapies in development are investigational and have not been approved by any regulatory bodies for use in the investigational indications listed below.

INVESTIGATIONAL THERAPY	PLATFORM	INVESTIGATIONAL INDICATION	PHASE	ADDITIONAL INFORMATION
Brigatinib*	***Targeted therapy***	*2L ALK+ non-small cell lung cancer (GL)*	***Phase 3***	ALK inhibitor
Cabozantinib*	***Targeted therapy***	*Metastatic castration-resistant prostate cancer (JP)*	***Phase 3***	Tyrosine kinase inhibitor including MET/AXL/VEGFR Cabozantinib is being developed in Japan in collaboration with Exelixis.
		2L metastatic non-small cell lung cancer (JP)	***Phase 3***	
Ixazomib*	***Proteasome inhibitor***	*Maint. newly diagnosed multiple myeloma post-stem cell transplant (US, EU)*	***Phase 3***	Proteasome inhibitor
		Maint. newly diagnosed multiple myeloma without stem cell transplant (US, EU, CN)	***Phase 3***	
Mobocertinib*	***Targeted therapy***	*2L EGFR Exon20 insertion non-small cell lung cancer (EU, CN)*	***Filed***	Oral EGFR Exon20 tyrosine kinase inhibitor
		1L EGFR Exon20 insertion non-small cell lung cancer (US, EU, GEM)	***Phase 3***	
Ponatinib*	***Targeted therapy***	*FL Ph+ acute lymphocytic leukemia (US)*	***Phase 3***	BCR-ABL inhibitor Takeda shares development rights with Incyte Corp. (Europe, Turkey and Israel) and Otsuka Pharm. (Asia Pacific territories).
Relugolix* (TAK-385)	***Small molecule***	*Prostate cancer (JP, Asian countries)*	***Phase 3***	GnRH antagonist Relugolix is being developed in Japan and Asian countries in collaboration with Myovant Sciences, Inc.
Modakafusp Alfa (TAK-573)	***I-O cold-to-hot***	*Multiple myeloma*	***Phase 1/2***	Immune targeting attenuated cytokine Modakafusp alfa (TAK-573) was licensed from Teva Pharmaceuticals.
		Solid tumors	***Phase 1/2***	

INVESTIGATIONAL THERAPY	PLATFORM	INVESTIGATIONAL INDICATION	PHASE	ADDITIONAL INFORMATION
Subasumstat (TAK-981)	***I-O cold-to-hot***	*Solid tumors*	***Phase 1/2***	SUMOylation inhibitor
		Non-Hodgkin lymphoma	***Phase 1/2***	
		Multiple myeloma	***Phase 1/2***	
TAK-007	***I-O redirected immunity***	*B-cell malignancies*	***Phase 2^***	CD19 CAR NK TAK-007 is being developed in collaboration with The University of Texas MD Anderson Cancer Center.
TAK-186	***I-O redirected immunity***	*Solid tumors*	***Phase 1/2***	EGFR x CD3 targeting COBRA (COnditional Bispecific Redirected Activation) T cell engager immunotherapy
TAK-605	***I-O cold-to-hot***	*Solid tumors*	***Phase 1/2***	Armored oncolytic virus TAK-605 is being developed in collaboration with Turnstone Biologics.
TAK-102	***I-O redirected immunity***	*Solid tumors*	***Phase 1***	GPC3 targeted CAR-T TAK-102 was licensed from Noile-Immune Biotech.
TAK-103	***I-O redirected immunity***	*Solid tumors*	***Phase 1***	Mesothelin targeted CAR-T TAK-103 was licensed from Noile-Immune Biotech.
TAK-500	***I-O cold-to-hot***	*Solid tumors*	***Phase 1***	Targeted STING agonist
TAK-676	***I-O cold-to-hot***	*Solid tumors*	***Phase 1***	STING agonist
TAK-940	***I-O redirected immunity***	*B-cell malignancies*	***Phase 1***	CD19-1XX CAR-T TAK-940 is being developed in collaboration with Memorial Sloan Kettering Cancer Center.

*Marketed products have received approval in one or more jurisdictions.
^Study actively recruiting.
All programs have global development rights unless otherwise noted.
GL = global (USA, Europe, Japan, China) / EU = Europe / JP = Japan / CN = China / GEM = global emerging markets
